Professional Profile

Graduate of the Software Analysis and Development Technology Program (ADSO) from SENA, with experience in full stack development, web applications, API integrations, databases, and technology solutions focused on business process automation. I have participated in the development of e-commerce platforms, administrative systems, inventory control systems, AI-powered conversational assistants, and access control applications using QR and barcode scanning.

I have knowledge of technologies such as Node.js, Express, SQL Server, MySQL Workbench, React Native, React CLI, JavaScript, and web interface development. I consider myself a responsible and proactive person with fast learning abilities, problem-solving orientation, and strong adaptability for implementing new technologies. I have skills in teamwork, adaptation to different technological environments, and the development of efficient solutions focused on process improvement and user experience.

Academic Background

Professional Technologist in Software Analysis and Development (ADSO)

Commercial Technical High School Graduate
Accounting Technician
Servicio Nacional de Aprendizaje (SENA)
Status: Completed

Experience and Projects

“BikeStore” Online Store Development

- Full development of an e-commerce platform for bicycle sales.
- Implementation of shopping cart, user authentication, and administrative dashboard.
- Backend integration using Node.js and MySQL databases.
- Modern frontend development using HTML, CSS, and JavaScript.
- Implementation of administrator and super administrator roles.

SENA Access Control System

- Development of an access control system using QR codes and fingerprint authentication.
- Design of administrative modules and report generation.
- Integration of mobile technologies with React Native and Electron.
- User management and validation within the system.

Enterprise Chatbot Development

- Full stack design and implementation of customer service flows using webhooks integrated with Meta and Twilio.
- Development of an administrative dashboard and chat API connected to OpenAI and automation tools (function calling) for catalog, stock, pricing, and quotations.
- Creation of conversational experiences for digital channels, including interactive menus, welcome messages, business hours, and transfer to human agents.
- Implementation of message persistence and context management for artificial intelligence models.
- Integration of consent management, campaigns, and multimedia content while maintaining consistency between the internal UI and outgoing messaging.

Administrative Module Development

- Creation of modules for monitoring business departments.
- Organization of logistics, IT, and human resources information.
- Implementation of monitoring and control functionalities.

Logistics, Inventory, and Operations

- Development of multi-warehouse and multi-point-of-sale inventory modules.

- Implementation of searches, queries, and low-stock alerts with role-based permissions.
- Construction of order flows, requisitions, distributions, and status histories.
- Development of branch transfer modules with traceability and evidence management through files and URLs.
- Modeling and integration of SQL Server databases for vehicle operational control, routes, license plates, drivers, cargo boxes, and schedules.
- Integration with corporate ecosystems and ERP systems using Node.js and Express.
- Generation and management of Excel exports for operational and administrative processes.

Technologies Used

Node.js, Express, SQL Server, OpenAI API, Meta WhatsApp API, Twilio, JWT, JavaScript, REST APIs, and frontend integrated into a corporate monorepo.

Technical Skills

- HTML5
 - CSS3
 - JavaScript
 - Node.js + Express
 - React Native
 - Electron
 - MySQL
 - REST APIs
 - Git and GitHub
 - Responsive Design
 - Frontend and Backend Development
 - SQL Server
-

Soft Skills

- Teamwork
 - Effective Communication
 - Problem Solving
 - Adaptability
 - Fast Learning
 - Responsibility and Commitment
-

Languages

- Spanish: Native
 - English: Basic / Intermediate (B2)
-
